(1) The first quarter of 2017 includes the attributable result deriving from BPI's sale of 2% of its stake in BFA (€-97 million), largely the result of valuation adjustments due to conversion differences, previously reported in equity. The fourth quarter of 2017 includes, in accordance with IAS 29, an impact of €-76 million after applying the accumulative inflationary effects of the Angolan economy during the year to BFA's financial statements. In the first half of 2018, the extraordinary result was largely a result of the devaluation of the Angolan currency. The impact of inflation in 2018 is considered part of the non-extraordinary results reported by BFA.

(2) The amount in the first quarter of 2017 derives from valuation adjustments due to conversion differences, transferred to P&L at the time of the sale by BPI of the 2% stake in BFA. The fourth quarter of 2017 includes, among other effects, the impact of the inflationary effects of Angola's economy (€76 million, gross). In the first half of 2018, the heading includes the impact of the devaluation of the Angolan currency, among other factors.
