Environmental Risk Management strategy

Roadmap 2019-2021 (I/II)

The Roadmap focuses on the following lines of action:

Key milestones so far – November 2020

01.

Environmental Risk Management Policy⁽¹⁾:

Implement the Environmental Risk Management Policy and review risk granting procedures taking into account regulatory and market developments

- The Board of Directors approved the Environmental Risk Management Policy in February 2019.
- CaixaBank's main subsidiaries (BPI, Vidacaixa and Caixabank Asset Management) approved their own policies, aligned with that of CaixaBank while taking into account the specific nature of their business.
- Definition of the model to integrate environmental-risk analysis into clients' onboarding process.
- Implementation of a questionnaire to assess and classify corporate clients and transactions from an environmental risk analysis perspective. The roll-out to the SME segment has already been planned.

02.

Risk metrics:

Develop indicators to measure CaixaBank Group's compliance with its defined risk-appetite, and ensure it meets current legislation on environmental risk management and climate change and the expectations of stakeholders

- The lending portfolio is managed with the intention of aligning its indirect impact on climate change with the Bank's risk appetite and its commitment to sustainability aims.
- The main indicator is based on the definition suggested by the Task Force on Climate-related Financial Disclosures (TCFD) and includes exposures to activities related to energy and utility industries, excluding renewables (carbon related assets, as defined in "Implementing the Recommendations of the TCFD").
- Ongoing development of additional management metrics to monitor ESG/climate risks and their fit within the established risk appetite and stakeholder expectations

03.

Governance model:

Implement a coherent, efficient and flexible governance model for managing environmental and climate-change related risks

- The highest management body for managing environmental risk is the Environmental Risk Management Committee, which was established and approved by the Board of Directors in February 2019. The Committee reports to the Management Committee and is chaired by the Chief Risk Officer (CRO). It is responsible for analysing and, where appropriate, approving proposals made by the Bank's functional areas with regards to its strategic position on Environmental Risk Management.
- A Corporate Directorate for Environmental Risk Management was created in 2018, reporting to the CRO. It is responsible for managing environmental and climate-related risk and it coordinates the implementation of the Roadmap and oversees the analysis of environmental risk within the risk approval processes.

Environmental Risk Management strategy

Roadmap 2019-2021 (II/II)

The Roadmap focuses on the following lines of action:

Key milestones so far – November 2020

04.

Taxonomy:

Structure and categorise customers and products and services in accordance with environmental and climate-change criteria in line with current regulatory requirements.

- In 2019, CaixaBank joined the UNEP FI working group to establish a Taxonomy guide for banking products (High Level Recommendations for Banks on the application of the EU Taxonomy).
- In line with the EU Taxonomy, operational and documentary criteria are being defined and rolled out for the classification of transactions concerning the main sectors.
- CaixaBank's credit processes and IT systems have been adapted to collect information on energy-efficiency certificates for mortgages and developer loans by YE 2020.

05.

External Reporting:

Establish an external reporting model to ensure that information on environment and climate change is publicly disclosed in accordance with the regulations applicable at all times

- In February 2019, CaixaBank published its Declaration on Climate Change, approved by the Board of Directors, in which it undertakes to take the necessary measures to comply with the Paris Agreement.
- In April 2019, CaixaBank joined the second phase of the UNEP FI pilot to promote the implementation of the TCFD recommendations of the Financial Stability Board (TCFD Banking Pilot Phase II), with a focus on the analysis of physical and transition risk scenarios. CaixaBank is currently focusing on the analysis and quantification of Transition Risks in the Oil & Gas and Power Utility sectors.

06.

Business opportunities:

Ensure that CaixaBank seizes current and future business opportunities related to sustainable financing and investment within the framework established by the Environmental Strategy, including issuance of Social and/or Green bonds

- Dedicated and specialised teams have been incorporated within the Business Areas, including a Sustainable Finance team within CIB.
- Ongoing monitoring and reporting of environmentally-sustainable loan production.
- In December 2019, CaixaBank signed the United Nations Collective Commitment to Climate Action. Under this commitment, announced within the framework of the Principles for Responsible Banking, banks undertake to align their portfolios to reflect and finance the low-carbon and climate-resilient economy that is required to limit global warming to below 2 degrees Celsius.

CaixaBank SDG Bond Framework – Key features and rationale

- ▶ CaixaBank supports the UN SDGs while acknowledging the key role played by financial institutions in **helping to mobilise capital** for the transition to a low-carbon, resource-efficient and inclusive economy
- ▶ The **SDG Bond Framework developed in 2019** represents a declaration of intent to contribute to the process of transition to a low carbon economy, efficient use of resources, to financial inclusion and to the economy and employment in general

It allows for the possibility to issue:

- ✓ **Green bonds** (proceeds allocated to green projects only)
- ✓ **Social bonds** (proceeds allocated to social projects only)
- ✓ **Sustainability bonds**

- **Aiming at:**

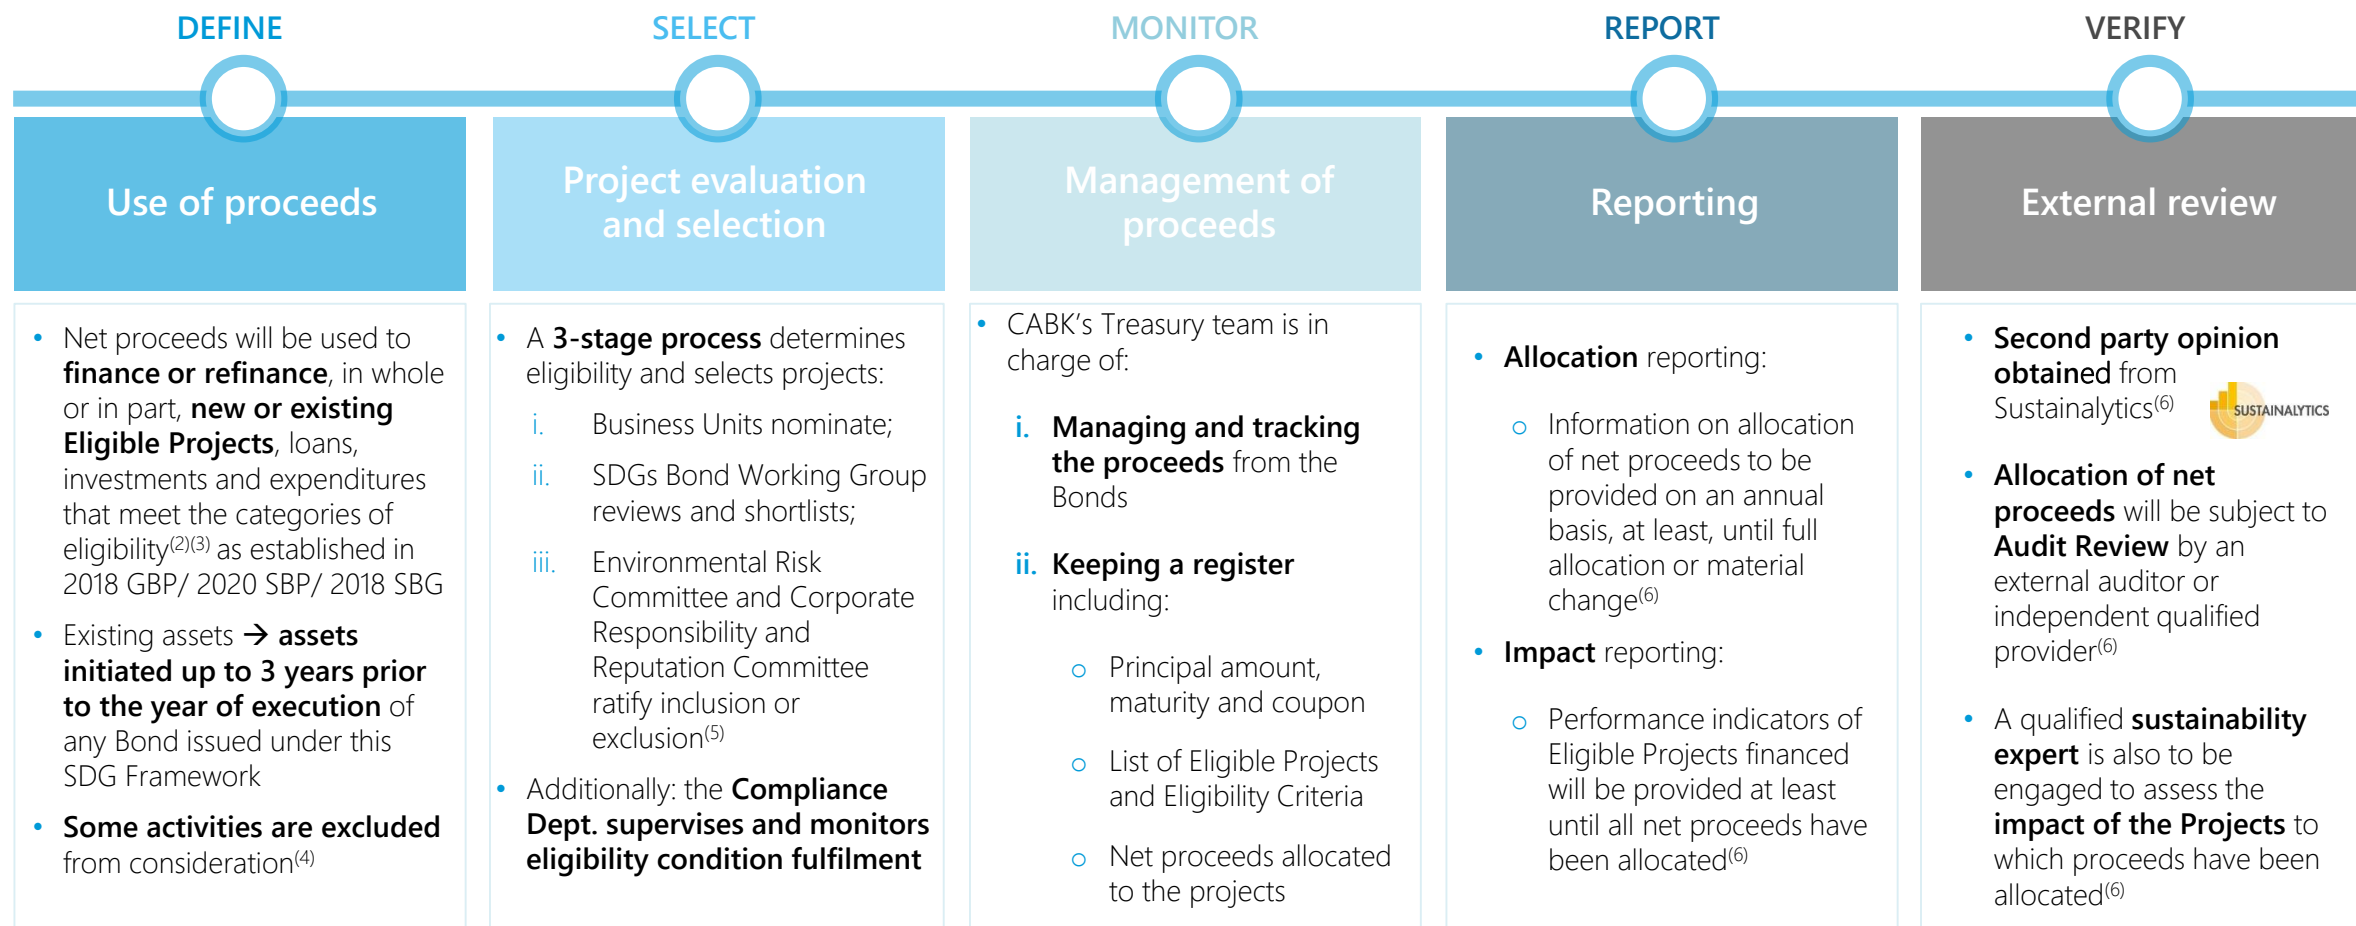

1. Reinforcing **corporate commitment** to **responsible banking**
2. Fostering **responsible business** and increasing **customer satisfaction** while raising **ESG awareness**
3. Offering a new **investment alternative** to ESG investors

Bonds issued under this Framework will promote the following SDGs

SDG Bond Framework aligns with the four key pillars of ICMA 2018 GBP, 2020 SBP and 2018 SGB⁽¹⁾

(1) ICMA Green Bond Principles 2018 (2018 GBP) and Social Bond Principles 2020 (2020 SBP) and Sustainability Bond Guidelines 2018 (2018 SGB). (3) Expenditures could be considered if compliant with the final EU GBS (Green Bond Standard) definition of Green expenditures. (4) Additional exclusions on top of the exclusions specified in the ESG Management Policies. (5) At least on an annual basis, the alignment of Eligible Projects with the Eligibility Criteria will be re-assessed. (6) It will be published on CaixaBank's website.

This date is currently being reviewed by the European Commission as it awaits its alignment with the entry into force of the new IFRS 17: Insurance Contracts (expected on 1 January 2023), which will govern the presentation and measurement of insurance contracts (including technical provisions). Accordingly, these investments are grouped under "Assets under the insurance business" on the balance sheet. To make the information more readily comparable, the Group has also grouped together the technical provisions relating to Unit Link and Flexible Investment Annuity (part under management), which are now reported jointly under 'Liabilities under the insurance business'.
