Updated August 1st 2017

Geared to the performance of the Spanish economy

The economic recovery in Spain remains strong...

... with support from the banking sector

- Largest client base
- Premium network
- Solid balance sheet

The labour market continues to improve

RE market stabilised and geared for growth

- ▶ **The economic recovery continues to show significant traction:** GDP increased by +0.9% qoq in 2Q17 (3.1% yoy), 0.1 pp above the growth rate in 1Q17. We expect 2017 GDP annual growth above 3% for the third consecutive year
- ▶ **Macro dynamics support volume growth and asset quality improvement:** new lending activity to households is robust and it is starting to recover for corporates (mostly SMEs) as a result of increasing demand and improved financial conditions. Lower net interest income headwinds, declining impairment losses and cost containment are improving profitability of the industry
