Geared to the performance of the Spanish economy

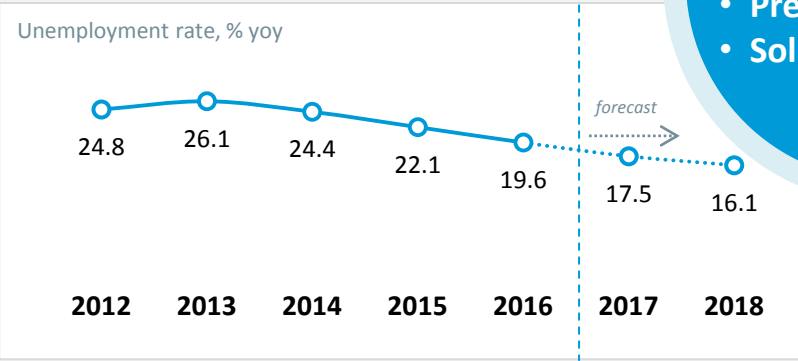

The economic recovery in Spain remains strong...

... with support from the banking sector

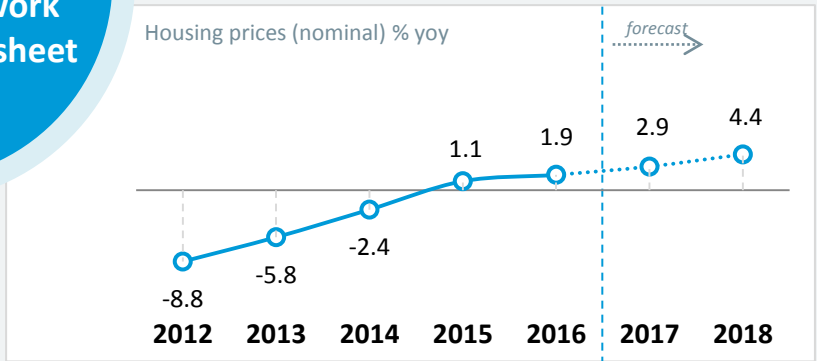

- Largest client base
- Premium network
- Solid balance sheet

The labour market continues to improve

RE market stabilised and geared for growth

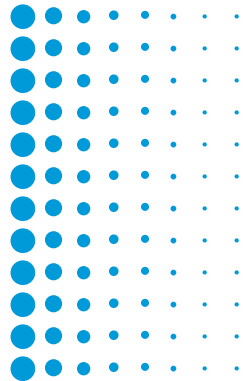

- ▶ **The economic recovery continues to show significant traction:** GDP increased by +0.8% qoq in 1Q17 (3.0% yoy), 1 pp above the growth rate in 4Q16. We expect GDP to grow at a similar pace in 2Q17
- ▶ **Macro dynamics support volume growth and asset quality improvement:** new lending activity to households is robust and it is starting to recover for corporates (mostly SMEs) as a result of pent-up demand and improved financial conditions. Lower net interest income headwinds, declining impairment losses and cost containment are improving profitability of the industry
