| Accredited Name                    | Project Name | Volume               | Caixabank connection |
| BEATRICE OFFSHORE WINDFARM LIMITED | BEATRICE     | 1,210,986,945.98 GBP | 88,575,318.75 GBP    |

### Identified impacts principals:

The project has assessed the social impacts in the communities and environmental via an Environmental Impact Assessment, identifying potential impacts in the aquatic fauna. For this reason, a plan of follow-up and minimisation of the impacts has been defined including programmes in collaboration with external experts from Aberdeen University.

### Indicators of the impact:

- The project will allow generating enough electricity to supply 450,000 homes, which is equivalent to 3 times the number of homes in the regions of Moray and Highland
- 890 jobs generated in the construction phase
- 90 jobs generated to develop the activity
- Collaborative project development with experts from Aberdeen University
-
