Note: The financial information contained in this document is unaudited and, accordingly, is subject to change. The consolidated income statement and the consolidated balance sheet and the corresponding breakdowns of those statements provided in this report, are presented under management criteria, but have still been prepared in accordance with International Financial Reporting Standards (IFRS-EU) as adopted by the European Union under the terms of Regulation (EC) No 1606/2002 of the European Parliament and of the Council of 19 July 2002, as subsequently modified. In preparing these statements, Circular 4/2017 of the Bank of Spain of 6 December, as subsequently modified, has also been taken into due account in that it adapts IFRS-EU to Spanish credit institutions.

This report has been prepared from the accounting records of CaixaBank, S.A. and the other Group companies, and includes certain adjustments and reclassifications required to apply the policies and criteria used by the Group companies on a consistent basis with those of CaixaBank. For this reason, and specifically in the case of BPI, the information contained in this document does not coincide with certain aspects presented in BPI's publication of financial information. Likewise, the financial information regarding investees has been prepared primarily on the basis of estimates made by the Group's directors, hereinafter the "Company".

Figures are presented in millions of euros unless the use of another monetary unit is stated explicitly, and may be expressed as either million euros or € million. Certain financial information in this report was rounded off and, specifically, the figures shown herein as totals may differ slightly from the arithmetic sum of the individual figures given before them.

In accordance with the Guidelines on Alternative Performance Measures (APMs) published by the European Securities and Markets Authority on 30 June 2015 (ESMA/2015/1057), the appendices hereto provide the definition of certain alternative financial measures and, where appropriate, the reconciliation with the items contained on the financial statements for the period in question.

In accordance with the Amendments to IFRS 4 and subsequent reviews, the Group has decided to apply temporary exemption from applying IFRS 9 to the financial investments of the Group's insurance firms for all periods that come before 1 January 2023, aligning its first application with the entry into force of the new IFRS 17: Insurance Contracts (expected on 1 January 2023), which will govern the presentation and measurement of insurance contracts (including technical provisions). Accordingly, these investments are measured in accordance with IAS 39 and grouped under the heading "Assets under the insurance business" on the balance sheet. To make the information more readily comparable, the Group has also grouped together the technical provisions corresponding to Unit Link and Flexible Investment Life Annuity (the part managed), which are now reported jointly under 'Liabilities under the insurance business'.

- CaixaBank continues to strengthen its **leadership of the digital banking market**, with a base of 11 million digital customers², maintaining a firm commitment towards digital transformation and supporting innovative companies with a potential for growth.
- The magazine Global Finance named CaixaBank the "Most Innovative Private Bank in Western Europe" at the World's Best Private Banks Awards 2022 for its digital transformation strategy and continuous innovation.
- CaixaBank has been recognised with the "Best shareholder service for a listed company 2021" at the *Rankia de Bolsa* awards, thanks to its online Shareholders' area and the financial disclosure activities carried out in person and online and made available on its corporate website.

Sustainable banking and social commitment

• CaixaBank launched in 2022 various initiatives aimed at sustainable business development, including:

A new ESG advisory service to help its corporate and institutional customers to analyse and set up a sustainability strategy and stance, as a way to drive the transition of customers to carbon neutrality and support them in the establishment of sustainable objectives.

The granting of various green loans and sustainable financing, evidencing its leadership in different sectors, e.g. financing to develop and build wind farms and sustainable financing in the maritime sector.

The issuance of 6 million cards 100% recycled in Spain, made from materials with a lower environmental impact, such as recycled or biodegradable plastic.

- CaixaBank has shown its commitment with the people affected by the war in Ukraine, offering fee-free
 transfers and the use of CaixaBank ATMs by customers of Ukrainian banks free of charge, as well as offering
 a Social Account, which includes a checking account, a bank card and access to online banking with no
 service fees. Furthermore, the bank has put in place a platform for donations in collaboration with various
 NGOs, and CaixaBank's network of volunteers has launched different human aid initiatives.
- In its commitment to financial inclusion, CaixaBank has enhanced the personalised services it provides to the senior group, with the aim of offering a high quality service and maintaining its leading position in the sector, by creating a team of 2,000 senior advisers specialising in personalised services to the elderly.
 - In addition, CaixaBank provides its services in 420 towns and villages in which it is the only bank present. The Ofibús mobile branches also provide service in 426 rural municipalities, 77% of which are at risk of financial exclusion and where approximately 250,000 inhabitants reside.
- CaixaBank has been certified with distinction in Good Corporate Governance by AENOR, becoming one of the first companies to obtain this certification.

Macroeconomic trends and state of the financial markets

Global economic outlook

Following the historic recession in 2020 resulting from the Covid pandemic (a **world GDP** drop of 3.1%), 2021 was characterised by an intense economic recovery (+6.1%). 2022 is shaping up to be a year of continuity in this recovery, supported by the high proportion of the population already vaccinated, stored demand, and

expansive economic policies. Nonetheless, the challenges continue to be important, as to the uncertainty associated with Covid we need to add a rise in inflation that is more persistent than expected, supply problems arising from bottlenecks and the turn in monetary policy of a good number of countries.

On top of these challenges, we now have the Ukraine war. It is an event with significant disruptive potential that has led us to revise the world GDP growth downwards by slightly more than half a point with respect to that expected before the war, albeit the uncertainty around this outlook is significant. In this setting, we forecast global economic growth of around 3.5% in 2022. The effects will be asymmetric by region, with a greater negative impact on the European economies.

GDP¹ , prevision growth 2022 Annual change (%)

Economic scenario - Europe, Spain and Portugal

Following a slightly positive end of the year 2021 (0.3% quarter on quarter in the fourth quarter of 2021, in the **eurozone** the outbreak of war in Ukraine is a heavy blow for the expectations of an acceleration in activity which was being counted on owing to the foreseeable "downgrading" of Covid, the effect of the European Funds (NGEU) and the normalisation of activity in the value chains.

This increase in the energy bill and the rise in uncertainty explain the 1.4 pps reduction in projected growth for the eurozone in 2022, cutting it to 2.6%. By country, the steepest downward revisions are in Germany (-2.1 pps, to 1.2%) and Italy (-1.7 pps, to 2.4%), given their greater exposure to imports of gas from Russia and the greater relative weight of industry in their economic structure, a sector particularly affected by the bottlenecks and the increase in the price of a large part of their inputs. On the other hand, the sharp rise already registered in energy prices, coupled with the prospect of them staying high for longer, explain the significant upward revision of average inflation for 2022, bringing it to 6.7% and marking a new annual high since the beginning of the series (1997). Data at March confirmed a significant rise of inflation to 7.4%, compared to 5.9% in February.

The **Spanish economy** ended 2021 with strong growth, recording a GDP rise of 2.2% in the fourth quarter of 2021 (according to data revised by the Spanish National Statistics Institute on 25 March), which allowed for a growth rate of 5.1% for the year as a whole. In the early months of 2022, and until the outbreak of war in Ukraine, activity indicators showed a good performance and the outlook was very positive. The retreat of the sixth wave of Covid, the good shape of the labour market, the deployment of European funds and the favourable outlook for the tourist season invited optimism, although there was also some concern about a higher and more persistent inflation than expected months earlier.

However, the outbreak of the conflict is altering this scenario and will have a substantial impact on both economic activity and inflation, through rising energy and raw materials prices, increased stress on global

(1) CaixaBank Research forecasts for

supply chains, and a deterioration in agents' confidence. There are currently few post-invasion indicators available. The most significant impacts have been the sharp deterioration in consumer confidence in March to levels not seen since the outbreak of the pandemic and the rise of inflation to 9.8% in March, which is the highest level since May 1985.

As a consequence of the conflict, we have revised the GDP growth forecasts for 2022 downward, from 5.5% to 4.2% (under the assumption of an average oil price of \$105 per barrel). In addition, as a result of tensions in the energy and food markets, we have revised the expected inflation upwards. Therefore, we estimate that the inflation will reach 6.8%, as opposed to the 4.5% of the previous forecasts. These projections are subject to an unusual level of uncertainty.

The government has presented an action plan to cushion the rise in energy prices. The plan will have a cost of around €6,000 million and will include €10,000 million in ICO loans. However, the measures aimed at reducing the price of electricity are still pending, and these will be important in mitigating pressures on inflation over the short term.

In **Portugal**, the outlook for GDP growth in 2022 was highly positive, based on the boost in investments associated with European funds, the savings accumulated by the families during the lockdown, and the expected recovery of international tourism. However, the outbreak of the war has led us to revise GDP growth forecasts down to 4.2% and inflation upwards. This revision is lower than that of Spain, since the forecast for Portugal did not include the surprise rise that took place in the fourth quarter of 2021.

State of the financial markets

The central banks have taken a proactive stance in the face of inflationary pressures. At its meeting last March, the Federal Reserve decided to start the cycle of interest rate hikes (+0.25 p.p.), and increases of at least the same magnitude are expected at the remaining 6 meetings in 2022. Moreover, during 2023 and 2024, most Fed members believe that it will be necessary to raise interest rates above the level they consider for long-term equilibrium (2.4%) in order to offset rising inflation The Fed is also expected to begin reducing its balance sheet size this summer.

Meanwhile, the ECB has reinforced expectations of ending its programme of public debt purchases at some point in the third quarter (although it will continue to reinvest assets at maturity), and then, starting to increase interest rates. The markets are currently anticipating that benchmark rates will no longer be in negative territory this year, and that there may be seven or eight rate hikes of 0.25% each by the end of next year.

The financial markets have been trading against a backdrop of high volatility, marked by the evolution of the war and the withdrawal of the central banks' monetary stimuli. These factors have led to a significant increase of sovereign debt interest rates, with the 10-year US bond rising by 140 basis points to 2.9% and the equivalent German bund by 115 to 0.9%. Meanwhile, the risk premiums in the eurozone area have increased 30 basis points. With regard to equity, the stock markets have recovered from the slump caused by the outbreak of the war, albeit overshadowed by a highly uncertain outlook for corporate earnings. The euro, on the other hand, has weakened against the dollar owing to of the Greenback's role as safe-haven asset faced with the expectation of more restrictive monetary policy in the United States than in the EMU.

Income statement

For accounting purposes, the reference date taken for the merger is 31 March 2021, the date on which the financial statements included Bankia's assets and liabilities at fair value. The results in the various lines of the income statement were integrated in April 2021, thus affecting the year-on-year comparability of the information. In addition, the result generated in 2021 includes relevant extraordinary impacts related to the merger.

Year-on-year and quarterly performance

Attributable profit in the first quarter of 2022 amounts to €707 million, versus €4,786 million in 2021, which included the extraordinary aspects related to the merger (negative consolidation difference for €4,300 million and extraordinary expenses for €-28 million, net).

• With the aim of facilitating the comparability, the section Comparative proforma income statement includes an analysis of the performance of each of the items of the income statement under a unified vision, that is, after eliminating the extraordinary impacts associated with the merger and incorporating the results generated by Bankia in the first quarter of 2021 before the merger.

In relation to the performance of core income by item, following the merger in 2021, fees and commissions from the sale of insurance products were received from the agreement between Bankia and Mapfre and 49% of the attributable income from Bankia Vida was recognised in the item Share of profit/(loss) of entities accounted for using the equity method. As of 2022, following the acquisition of 100% of Bankia Vida at the end of the last quarter of 2021, its income and costs are integrated by global consolidation (in the items Net interest income and Income and expenses under insurance or reinsurance contracts).

• The year on year evolution of profit (-85.2%) is mainly due to the extraordinary impacts associated with the merger in 2021. Stripping out this effect, it grows 37.6%.

In addition, the various lines of the income statement are impacted by the inorganic growth, highlighting the core income (+33.6%) and the recurring administrative expenses, depreciation and amortisation (+32.6%).

• The change in attributable profit with respect to the previous quarter is mainly impacted by the recognition in the fourth quarter of 2021 of the Deposit Guarantee Fund (DGF) for €-396 million in Other operating income and expense, as well as higher Allowances for insolvency risk and Other charges to provisions.

Core income dropped 4.4% in the quarter. The performance of the various lines of core income is affected by Bankia Vida's global consolidation following the acquisition of 100% of the company in the last quarter of 2021. In addition, the line of fees and commissions was impacted in the fourth quarter of 2021 by higher activity due to positive seasonal factors and by the recognition of success fees from managing long-term savings products at the end of the year.

Comparative proforma income statement

Below is the income statement for 2022 compared to the comparative proforma income statement for 2021 (drawn up by adding the result generated by Bankia before the merger and excluding the extraordinary aspects related thereto).

The Profit/(loss) in the first quarter of 2022 **stands at €707 million** versus a comparative proforma Profit/(loss) of €580 million in 2021 (+21.9%), mainly due to the growth of **Pre-impairment income** (+5.4%) and the recognition in 2022 of lower **Allowances for insolvency risk** (-23.2%) and **Other charges to provisions** (-37.7%).

- Core income stands at €2,761 million (-1.7%), mainly impacted by the lower Net interest income (-5.4%). To interpret appropriately the performance of the various lines of core income, Bankia Vida's aforementioned incorporation should be considered, which has been integrated by global consolidation following the acquisition of 100% of the company in the last quarter of 2021.
- Decline of Share of profit/(loss) of entities accounted for using the equity method (-43.1%) following the sale of Erste Group Bank and higher net costs recognised in Other operating income and expense (+25.7%) versus a good performance of Trading income.
- Recurring administrative expenses, depreciation and amortisation dropped 4.3%, representing the capture of cost synergies mainly from savings associated with the labour agreement.

⁽¹⁾ Annualised quarterly proforma income/cost to average total assets.

Net interest income

- Net interest income totalled €1,550 million (down 5.4% with respect to the same period in 2021). In an environment of negative interest rates, this decrease is due to:
 - Lower income from loans due to the interest rate decline, impacted by the drop of the rate curve and the lower rates of the new production with respect to the maturities in the portfolio. A lower average volume is added to this rate reduction.
 - Lower contribution of the fixed-income portfolio due to the reduction of the average rate, as a result of the revaluation of assets at market value within the framework of the CaixaBank and Bankia integration in the first quarter of 2021.
 - Higher costs for financial intermediaries due to the increase of liquidity at negative rates.

These effects have been partially compensated by:

- Savings in the costs of institutional funding due to a lower price, mainly as a result of the revaluation of liabilities at market value within the framework of the CaixaBank and Bankia integration and a drop in the curve.
- Lower retail funding costs due to the drop in the rate.
- Inclusion of the financial margin on life savings insurance products of Bankia Vida, which after acquiring control over 100% of the company in the last quarter of 2021 has been integrated by global consolidation.
- Net interest income in the **quarter** declines 0.6% with respect to the previous quarter due to:
 - Decline in the income of loans and advances due to a lower average volume resulting from a lower number of days in the quarter.
 - Higher costs for financial institutions due to the increase of liquidity penalised with negative interest rates.

These effects have been partially compensated by:

- Higher contribution of the fixed-income portfolio due to higher volumes and the increase of the average rate.
- Savings in the costs of institutional funding due to a lower price, mainly as a result of the drop of the rate curve and the new issuances at lower rates than the maturities.
- Savings in retail funding costs mainly due to the positive impact of interest-rate hedges, established for a limited amount, that convert fixed into floating cash flows.
- Inclusion of the financial margin on life savings insurance products of Bankia Vida.

The **customer spread** increased by 2 basis points in the quarter to 1.63%, due to the drop of the cost of deposits and the stability in the return on lending activity.

The balance sheet spread is in line with the previous quarter, at 0.89%.

To help readers interpret the information contained in this report, the following aspects should be taken into account:

- According to applicable accounting standards, income resulting from the application of negative interest rates should be reported in the appropriate
 income classification. Financial intermediaries on the assets side includes the negative interest on the balances of financial intermediaries held on
 the liabilities side, the most significant being income from ECB funding measures (TLTRO and MRO). Conversely, the heading financial intermediaries
 on the liabilities side shows the negative interest on the balances of financial intermediaries on the assets side. Only the net amount between income
 and expense for both headings has economic significance.
- "Other assets with returns" and "Other funds with cost" relate largely to the Group's life insurance activity.
- The balances of all headings except "Other assets" and "Other funds" correspond to balances with returns/cost. "Other assets" and "Other funds" incorporate balance items that do not have an impact on the Net interest income and on returns and costs that are not assigned to any other item.

Fees and commissions

- Fee and commission income grew to €969 million, up 2.9% on 2021 (-12.0% with respect to the fourth quarter, which was impacted by success fees and seasonal aspects).
- Banking services, securities and other fees includes income on securities transactions, transactions, risk activities, deposit management, payment methods and wholesale banking.
 - Recurring fees and commissions dropped 3.3%, impacted by the consolidation of the customer loyalty programmes, among other factors. The quarterly performance (-10.6%) is impacted also by the usual rise in transactions in the fourth quarter of the year.

Fees and commissions from wholesale banking show a good performance when compared to the same period of the previous year (+22.0%) and decline with respect to the previous quarter (-6.0%), which experienced higher activity in investment banking.

- Fees and commissions from the sale of insurance products grew when compared to 2021 (+2.3%). Their performance is negatively impacted by the drop of fees and commissions from the sale of insurance products following the effective control of Bankia Vida and positively affected by the quarterly accrual of the 10-year phased in income associated with the renegotiation of the agreement to distribute non-life insurance entered with SegurCaixa Adeslas in the last quarter of 2021. The quarterly change (-13.9%) is impacted also by the recognition of income associated with the achievement of commercial objectives in the fourth quarter of the previous year.
- Fees and commissions from managing long-term savings products (investment funds, pension plans and Unit Link) stand at €345 million. Growth of 10.3% year-on year, despite the volatility in the markets in the first quarter of 2022, due to managing higher asset volumes following the good performance of both markets and sales in 2021. With respect to the previous quarter (-14.2%), it is mainly impacted by the recognition of success fees in the fourth quarter of 2021 and the market slump in the first quarter of 2022.
 - Commissions from mutual funds, managed accounts and SICAVs came to €216 million, with a year-on-year increase of 11.0% and a drop of 10.5% quarter on quarter.
 - Commissions from managing pension plans stand at €76 million, showing a performance of +1.7% year-on-year and of -20.6% in the quarter.
 - Unit Link fees and commissions reached €53 million, +22.1% on the same period of 2021 and -18.5% on the previous quarter.

Income from equity investments

• Attributable profit of entities accounted for using the equity method stand at €50 million. Down 43.1% with respect to the same period in 2021, impacted among others by not including the results attributed to Erste Group Bank since the third quarter of 2021 after its divestment and by the effective control of Bankia Vida at the end of 2021 and its global integration as of January 2022. The latter mainly explains the reduction (-27.8%) of the item when compared to the fourth quarter of the previous year.

Other operating income and expense

- Other operating income and expense includes, among other items, income and expenses of non-real estate subsidiaries, income from rentals and expenses incurred in managing foreclosed properties and contributions, levies and taxes. With regard to the contributions and levies, its timing generates a seasonal impact on the quarterly performance under this heading:
 - Recognition in the first quarter of an estimation of the Spanish property tax for €22 million (€19 million in 2021) and the contribution to the Portuguese banking sector for €21.2 million (€18.8 million in 2021).
 - The contribution to the SRF¹ of €181 million stands out in the second quarter of 2021.
 - Contribution to the Deposit Guarantee Fund (DGF) of €396 million in the fourth quarter.

(1) Including BPI's contribution to the Portuguese Resolution Fund of €8.5 million in 2021.

Administration expenses, depreciation and amortisation

- Year-on-year drop in **Recurring administrative expenses, depreciation and amortisation** of 4.3% supported on the synergies achieved following the integration. Personnel expenses (-5.3%) mainly shows the savings following the departure of employees within the framework of the labour agreement. General expenses (-7.2%) include the capture of synergies associated with Bankia's merger.
- With respect to the quarterly performance, Recurring administrative expenses, depreciation and amortisation dropped 3.4% impacted by the departure of employees in both quarters and the savings in general expenses associated with the synergies from the integration. General expenses decreased 3.2% in the quarter despite recognising €9 million associated with the Spanish property tax on own-use properties.

The core cost-to-income ratio (12 months) reached 55.8%.

Allowances for insolvency risk and other charges to provisions

• Allowances for insolvency risk amounted to €-228 million, versus €-297 million in the same period of 2021 (-23.2%).

In the first quarter, a fund was set up for €214 million to reflect the estimated impact from the change of the macroeconomic scenario due to the Ukraine war.

Furthermore, the Covid-19 collective fund stands at \le 1,196 million at the end of the quarter (\le 1,395 million at the end of 2021). At the end of each reporting period, the Group takes into account the gradually increased visibility of the situation of customers that benefitted from support measures upon their expiration.

The cost of risk (last 12 months) came to 0.23%.

 Other charges to provisions shows mainly the coverage of future contingencies and impairment of other assets.

The first quarter of 2022 includes the use of provisions established in 2021 to cover asset write-downs from the plan to restructure the commercial network. When the expense materialises, it is recognised in Gains/(losses) on disposal of assets and others (€16 million in the first quarter).

Allowances were recognised for legal contingencies in the last quarter of 2021, employing conservative criteria, as well as a provision associated with the cost arising from BPI's early retirements.

Gains/(losses) on disposal of assets and others

• Gains/(losses) on disposal of assets and others includes, essentially, the results of completed one-off transactions and proceeds on asset sales and write-downs.

The real estate results in 2022 is mainly impacted by higher asset sales.

The item Other includes in the first quarter of 2022 the materialisation of the asset write-downs within the framework of the aforementioned plan to restructure the commercial network.

In the fourth quarter of 2021, it includes the gains on the sale of the stake held in Erste and the recognition of other income and asset write-downs.

1- In accordance with the Amendments to IFRS 4 and subsequent reviews, the Group has decided to apply temporary exemption from applying IFRS 9 to the financial investments of the Group's insurance firms for all periods that come before 1 January 2023, aligning its first application with the entry into force of the new IFRS 17: Insurance Contracts (expected on 1 January 2023), which will govern the presentation and measurement of insurance contracts (including technical provisions). Accordingly, these investments are measured in accordance with IAS 39 and grouped under the heading "Assets under the insurance business" on the balance sheet. To make the information more readily comparable, the Group has also grouped together the technical provisions corresponding to Unit Link and Flexible Investment Life Annuity (the part managed), which are now reported jointly under 'Liabilities under the insurance business'.

- The Group's current level of capital adequacy confirms that the applicable requirements would not lead to any automatic restrictions according to the capital adequacy regulations, regarding the distribution of dividends, variable remuneration, and the interests of holders of Additional Tier 1 capital securities.
- On 20 April 2022, the bank paid its shareholders 0.1463 euros per share, corresponding to the ordinary dividend charged to 2021 profits and following the approval at the Annual General Meeting held on 8 April.
 This dividend distribution amounted to €1,179 million, an amount equivalent to 50% of consolidated net profit of 2021 adjusted by the extraordinary impacts from the merger with Bankia.

Furthermore, the Board of Directors approved on 27 January 2022 the Dividend Policy for 2022, establishing the distribution of a cash dividend between 50% and 60% of the consolidated net profit in a single payout in April 2023, subject to final approval at the Annual General Meeting.

The Board also stated the intention of CaixaBank, subject to the appropriate regulatory approval, to implement an open-market share buy-back programme during the 2022 Fiscal Year, in order to bring the CET1 ratio closer to our target level. In this respect, the Annual General Meeting held on April 2022 approved the reduction of CaixaBank's share capital up to a maximum amount of 10% -subject to the appropriate regulatory authorisations- through the redemption of treasury shares acquired within the framework of the aforementioned share buy-back programme. The definitive figure of capital reduction will be set by the Board of Directors within the aforementioned maximum limit and based on the number of shares that are acquired.

Segment reporting

This section shows financial information on the different business segments of the CaixaBank Group, which have been reconfigured in 2022. The 2021 data has been restated for comparability purposes.

The Group's key financial information is presented in the following business segments:

• Banking and Insurance: shows earnings from the Group's banking, insurance, asset management, real estate and ALCO's activity, among others, mainly in Spain.

Most of the activity and results generated by Bankia are included in this business. For accounting purposes, the recognition date of the merger is 31 March 2021, the financial statements included Bankia's assets and liabilities on that date at fair value. As of the second quarter of 2021, the generated results are included in the various lines of the income statement.

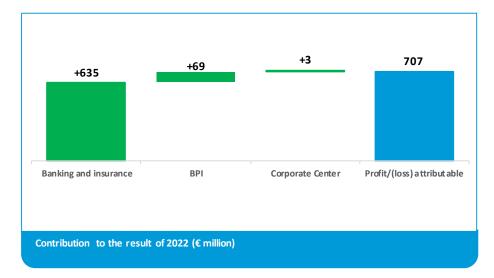

- BPI: covers the income from the BPI's domestic banking business, essentially in Portugal. The income statement shows the reversal of the fair value adjustments of the assets and liabilities resulting from the business combination.
- Corporate centre: includes the investees allocated to the equity investments business in the segmentation effective until 2021, that is, Telefónica, BFA, BCI, Coral Homes and Gramina Homes, as well as Erste Group Bank until its divestment in the fourth quarter of 2021. This line of business shows earnings from the stakes net of funding expenses.

In addition, the Group's excess capital is allocated to the corporate centre, which is calculated as the difference between the Group's total shareholders' equity and the capital assigned to the Banking and Insurance business, BPI and the investees allocated to the corporate centre. Specifically, the allocation of capital to these businesses and investees takes into account the 11.5% capital consumption for risk-weighted assets, as well as any applicable deductions. Liquidity is the counterpart of the excess capital allocated to the corporate centre.

The operating expenses of these business segments include both direct and indirect costs, which are assigned according to internal distribution methods. Specifically, the corporate expenses at Group level are assigned to the corporate centre.

Results for the first quarter of 2022 arranged by business are as follows:

Banking and insurance business

The performance in the first quarter of 2022 stands at €635 million (€4,723 million in the first quarter of 2021 which included the negative consolidation difference for an amount of €4,300 million and extraordinary expenses associated with the integration). Considering the proforma Profit/(loss) of the first quarter of 2021, which includes Bankia and does not include the extraordinary income, the Profit/(loss) increased by 21.7%.

The ROTE (last 12 months) stood at 7.9%, stripping put the extraordinary impacts recognised in 2021.

In 2021, the ratio excludes €4,272 million corresponding to the extraordinary impacts associated with the integration of Bankia and the gains on the partial sale of Comercia (€+420 million in 4Q20). The coupon for the part of the AT1 issue assigned to this business has also been deducted.

The performance in the first quarter of 2022 stands at €635 million. The following highlights shaped the proforma performance against 2021 (€522 million):

Gross income stands at €2,578 million (-0.3%):

- **Core income** dropped 2.6% with respect to the first quarter of 2021, mainly impacted by the net interest income (-6.7%).
- Trading income stands at €119 million, €42 million in the same period of 2021.
- Other operating income and expense include in both years the recognition of the expenses associated with the Spanish property tax of the real estate portfolio.
- Recurring administrative expenses, depreciation and amortisation amounted to €-1,394 million, down 4.7% mainly due to the capture of synergies, especially from the departure of employees within the framework of the labour agreement reached after the merger with Bankia.
- Pre-impairment income increased by 4.6% on the same period of the previous year.
- Allowances for insolvency risk amounted to €-262 million in the first quarter of 2022 (-16.0%) and Other charges de provisions stood at €-45 million (-37.1%).

The following table shows business activity and asset quality indicators at 31 March 2022:

- Loans and advances to customers, gross remains stable at €325,165 million, down 0.1%.
- Customer funds stood at €583,751 million, down 0.1%.
- The NPL ratio reached 3.6%, while the coverage ratio stood at 64%.

Insurance activity

The banking and insurance business includes the results of the activity carried out by the Group's various insurance firms, mainly VidaCaixa de Seguros y Reaseguros. These companies offer a highly specialised range of life insurance, pensions and general insurance products, all of which are marketed to the Group's customer base.

VidaCaixa's results include in the first quarter of 2022 the income from Bankia Vida (100% after the acquisition of 51% from Mapfre Vida on December 2021) and Bankia Pensiones (100% following the merger with VidaCaixa in 2021).

In addition to the VidaCaixa Group, the banking and insurance business includes the insurance investees from Bankia: Bankia Mediación (100%), SegurBankia (100%) and Sa Nostra Vida (18.7%).

The following table shows the income statement of the VidaCaixa Group and the proforma income statement that includes the income from investees incorporated from Bankia that are not part of VidaCaixa:

⁽¹⁾ At VidaCaixa level prior to consolidation adjustments. After acquiring control over 100% of Bankia Vida at the end of 2021 and its transfer to VidaCaixa, the results of Bankia Vida are integrated by global consolidation in 2022, mainly impacting the performance of Net interest income, Income and expense under insurance or reinsurance contracts and Recurring administrative expenses, depreciation and amortisation.

⁽²⁾ The proforma results of the insurance activity includes the following: VidaCaixa Group and other Bankia insurance investees: Bankia Mediación (100%), SegurBankia (100%) and Sa Nostra Vida (18.7%). In the proforma vision of 2021 the contribution of 49% of Bankia Vida is recognised in Share of profit/(loss) of entities accounted for using the equity method and is integrated by global consolidation in 2022.

The profit attributable to the VidaCaixa Group stands at €+200 million, up 10.6% with respect for the first quarter of 2021:

- **Net interest income** includes the margin on life savings insurance products, which was up 15.3% with respect to the same period of the previous year, impacted by the consolidation of Bankia Vida.
- Share of profit/(loss) of entities accounted for using the equity method mainly shows the contribution made by SegurCaixa Adeslas, 49.9 % of which is owned by VidaCaixa, and amounted to €+41 million (-11.1%).
- Net fee and commission income¹ is the net result of:
 - The fees and commissions received by VidaCaixa for managing Unit Linked products and pension plans.
 - The fees and commissions the insurance firms pay the banks for distributing their products.
- Income and expense under insurance or reinsurance contracts, which shows the margin obtained from the difference between premia and the technical provisions, claims and other expenses of life-risk products, grew 22.3%, impacted by the consolidation of Bankia Vida.
- Recurring administrative expenses, depreciation and amortisation also reflect the incorporation of Bankia Vida in the first quarter of 2022.

(1) The commercial network in Spain also receives fees for distributing its insurance products through the branch network, although these fees are not included in the income statement for the insurance business, because they relate instead to the banking business ex insurance.

BPI

Profit from the banking business of BPI amounted to €+69 million (€+58 million in the first quarter of 2021).

⁽¹⁾ The different period's ratios (12 months) exclude the following amounts net of taxes:

⁻ Extraordinary expenses.

⁻ Release of provisions corresponding to the quarterly recalculation carried out by the passing of time in relation to the expected losses associated with the funds due to credit risk adjustments made at the time BPI was acquired (€18 million and €30 million in the first quarter of 2022 and 2021, respectively).

⁻ Deduction of the coupon for the part of the AT1 issue assigned to this business.

- Gross income stands at €178 million, up 0.6% with respect to the first quarter of 2021:
 - **Core income** up 4.2% following the 0.6% increase of Net interest income and the good performance of Fee and commission income (+11.8%).
 - Trading income amounted to €9 million.
 - Other operating income and expense includes the contribution to the banking sector for €-21.2 million (€-18.8 million in the same period of the previous year) and €-3.9 million from the solidarity tax on the banking sector (€-3.6 million in the same period of 2021).
- Recurring administrative expenses, depreciation and amortisation stood at €-114 million (+1.5%). Increase in general expenses (+5.3%) and depreciation and amortisation (+5.3%), which is practically compensated by the decline in personnel expenses (-1.9% as a result of the savings associated with the early retirements throughout 2021).
- Allowances for insolvency risk stood at €34 million in the first quarter of 2022, €+15 million in the same period of the previous year, with one-off income in both years.

With regard to the indicators on business activity and asset quality of BPI, the following stands out:

- Loans and advances to customers, gross stood at €28,239 million, up 2.7% in the year, showing growth in all segments.
- Customer funds stood at €36,142 million, up 1.3% in the year. On-balance sheet funds grew 2.8% and Assets under management dropped 5.0% due to the performance of the markets.
- BPI's NPL ratio reached 2.3%, as per the CaixaBank Group's NPL classification criteria.
- The NPL coverage ratio came to 79%.

The following highlights shaped the year-on-year performance:

- The **Net interest income** corresponds to the net between the cost of financing the investee business and the income from the liquidity associated with the Group's excess capital. The year-on-year improvement is mainly due to the reduction of the average balance financed and lower funding rates due to adapting the rate to market conditions.
- The Share of profit/(loss) of entities accounted for using the equity method stood at €2 million (€21 million in the first quarter of 2021), after the divestment of the stake held in Erste Group Bank in the fourth quarter of 2021. The proforma vision considers the slightly negative contribution of Gramina Homes in the first quarter of 2021, the impact of which is not significant.

The CaixaBank share

- The CaixaBank share closed trading on 31 March 2022 at €3.077 euros/share, up 27.5% in the quarter and comfortably exceeding the performance of the general indices (-3.1% IBEX 35 and -9.2% EURO STOXX 50) and the selective bank benchmarks (+8.6% IBEX 35 Banks and -9.6% EURO STOXX Banks). The positive performance of the Spanish banking securities, and particularly CaixaBank's, mainly includes a higher sensitivity to a scenario of interest rate hikes.
- In general terms, the stock markets declined in the first quarter of 2022, which were dragged down due to the consequences of and uncertainty around the Ukraine war. The Russian invasion at the end of February only exacerbated the great volatility that had been rocking the markets for some months, which had been caused by the initial geopolitical tensions, the escalation of inflation and the expectations of a tighter monetary policy on both sides of the Atlantic.
- The war and the introduction of new restrictions on mobility in Asia have further aggravated the inflationary pressures, which has led the monetary authorities to stay on the road map despite the risk on economic growth. The Bank of England carried out two rate hikes in the quarter, while the Fed kicked off a rate-hiking cycle in March, signalling several more for 2022. The ECB has taken a somewhat more cautious approach, but it has also opened the door to raise interest rates when it completes its programme of asset purchases, which is expected to take place in the third quarter. The ECB's U-turn has boosted the revaluation of the banking securities that can benefit the most from higher interest rates, especially in regions with less direct exposure to Russia, such as Spain.
- In the first quarter of 2022, the number of shares traded¹ increased 77.2% with respect to the same period of the previous year and 117.5% on the fourth quarter of 2021. In addition, the trading volume¹ in euros was 122.1% up on the volume of shares traded in the first quarter of 2021 and 161.9% up on the previous quarter.

Shareholder returns

On 20 April 2022, the bank paid its shareholders 0.1463 euros per share, corresponding to the ordinary dividend charged to 2021 profits and following the approval at the Annual General Shareholders Meeting held on 8 April. This dividend distribution amounts to €1,179 million, and is equivalent to 50% of the consolidated net profit of 2021 adjusted by the extraordinary impacts from the merger with Bankia.

Furthermore, the Board of Directors approved on 27 January 2022 the Dividend Policy for the 2022 Fiscal Year, consisting of a cash distribution of 50%-60% of consolidated net profit, to be paid in a single payment in April 2023, subject to final approval from the Annual General Shareholders Meeting.

The Board also stated the intention of CaixaBank, subject to the appropriate regulatory approval, to implement an open-market share buy-back programme during the 2022 Fiscal Year, in order to bring the CET1 ratio closer to our target level. In this respect, the Annual General Shareholders Meeting held on April 2022 approved the reduction of CaixaBank's share capital up to a maximum amount of 10% -subject to the appropriate regulatory authorisations- through the redemption of treasury shares acquired within the framework of the aforementioned share buy-back programme. The definitive figure of capital reduction will be set by the Board of Directors within the aforementioned maximum limit and based on the number of shares that are acquired.

Alternative performance measures

In addition to the financial information prepared in accordance with International Financial Reporting Standards (IFRSs), this document includes certain Alternative Performance Measures (APMs) as defined in the guidelines on Alternative Performance Measures issued by the European Securities and Markets Authority on 30 June 2015 (ESMA/2015/1057) (the "ESMA Guidelines"). CaixaBank uses certain APMs, which have not been audited, for a better understanding of the Group's financial performance. These measures are considered additional disclosures and in no case replace the financial information prepared under IFRSs. Moreover, the way the Group defines and calculates these measures may differ to the way similar measures are calculated by other companies. Accordingly, they may not be comparable.

ESMA guidelines define an APM as a financial measure of historical or future performance, financial position, or cash flows, other than a financial measure defined or specified in the applicable financial reporting framework.

In accordance with these guidelines, following is a list of the APMs used, along with a reconciliation between certain management indicators and the indicators presented in the consolidated financial statements prepared under IFRS. Figures are presented in millions of euros unless the use of another unit is stated explicitly.

Alternative Performance Measures used by the Group

1- Profitability and cost-to-income

a) Customer spread:

Explanation: difference between:

- o average rate of return on loans (annualised quarterly income from loans and advances to customers divided by the net average balance of loans and advances to customers for the quarter).
- o average rate for retail customer funds (annualised quarterly cost of retail customer funds divided by the average balance of those same retail customer funds for the quarter, excluding subordinated liabilities that can be classified as retail).

Note: The average balances of the analysed period are calculated on the basis of the daily closing balances of said period, except in the case of some subsidiaries, for which the average balances are calculated as the arithmetic average of the closing balances of each month.

Purpose: allows the Group to track the spread between interest income and costs for customers.

b) Balance sheet spread:

Explanation: difference between:

- o average rate of return on assets (annualised interest income for the quarter divided by total average assets for the quarter).
- average cost of funds (annualised interest expenses for the quarter divided by total average funds for the quarter).

Note: The average balances of the analysed period are calculated on the basis of the daily closing balances of said period, except in the case of some subsidiaries, for which the average balances are calculated as the arithmetic average of the closing balances of each month.

Purpose: allows the Group to track the spread between interest income and cost for its on-balance sheet assets and liabilities.

d) ROTE:

Explanation: quotient between:

- o Profit/(loss) attributed to the Group (adjusted by the amount of the Additional Tier 1 coupon, registered in shareholder equity).
- o 12-month average shareholder equity plus valuation adjustments (calculated as the average value of the monthly average balances) deducting intangible assets using management criteria (calculated as the value of intangible assets in the public balance sheet, plus the intangible assets and goodwill associated with investees, net of provisions, recognised in Investments in joint ventures and associates in the public balance sheet).

Purpose: metric used to measure the return on a company's tangible equity.

2- Risk Management

a) Cost of risk:

Explanation: total allowances for insolvency risk (12 months) divided by average of gross loans to customers plus contingent liabilities, using management criteria (calculated as the average value of the monthly closing balances).

Purpose: indicator used to monitor and track the cost of allowances for insolvency risk on the loan book.

| | | 1Q21 | 2Q21 | 3Q21 | 4Q21 | 1Q22 |
|-------------|---|---------|---------|---------|---------|---------|
| Numerator | Allowances for insolvency risk 12M | 1,574 | 910 | 814 | 838 | 892 |
| Denominator | Average of gross loans + contingent liabilities 12M | 269,822 | 302,243 | 333,404 | 363,368 | 382,176 |
| | Cost of risk (%) | 0.58% | 0.30% | 0.24% | 0.23% | 0.23% |

b) Non-performing loan ratio:

Explanation: quotient between:

- o non-performing loans and advances to customers and contingent liabilities, using management criteria.
- o total gross loans and advances to customers and contingent liabilities, using management criteria.

Purpose: indicator used to monitor and track the change in the quality of the loan portfolio.

| | | 1Q21 | 2Q21 | 3Q21 | 4Q21 | 1Q22 |
|-------------|---|---------|---------|---------|---------|---------|
| Numerator | Non-performing loans and contingent liabilities | 14,077 | 14,005 | 13,955 | 13,634 | 13,361 |

| | Non-performing loan ratio (%) | 3.6% | 3.6% | 3.6% | 3.6% | 3.5% |

c) Coverage ratio:

Explanation: quotient between:

- o total credit loss provisions for loans and advances to customers and contingent liabilities, using management criteria.
- o non-performing loans and advances to customers and contingent liabilities, using management criteria.

Purpose: indicator used to monitor NPL coverage via provisions.

| | | 1Q21 | 2Q21 | 3Q21 | 4Q21 | 1Q22 |
|-------------|---|--------|--------|--------|--------|--------|
| Numerator | Provisions on loans and contingent liabilities | 9,415 | 9,001 | 8,955 | 8,625 | 8,648 |
| Denominator | Non-performing loans and contingent liabilities | 14,077 | 14,005 | 13,955 | 13,634 | 13,361 |
| | Coverage ratio (%) | 67% | 64% | 64% | 63% | 65% |

d) Real estate available for sale coverage ratio:

Explanation: quotient between:

- o gross debt cancelled at the foreclosure or surrender of the real estate asset less the present net book value of the real estate asset.
- o gross debt cancelled at the foreclosure or surrender of the real estate asset.

Note: As of 4Q21, it includes coverage for real estate exposure from Bankia (previously solely from CaixaBank).

Purpose: reflects the coverage level via write-downs and accounting provisions on foreclosed real estate assets available for sale.

| | | 1Q21 | 2Q21 | 3Q21 | 4Q21 | 1Q22 |
|-------------|---|-------|-------|-------|-------|-------|
| (a) | Gross debt cancelled at the foreclosure | 1,887 | 1,917 | 1,933 | 4,417 | 4,262 |

| Denominator | Gross debt cancelled at the foreclosure | 1,887 | 1,917 | 1,933 | 4,417 | 4,262 |
| | Real estate available for sale coverage ratio (%) | 43% | 42% | 42% | 48% | 48% |

e) Real estate available for sale coverage ratio with accounting provisions:

Explanation: quotient between:

- $\hspace{1cm} \circ \hspace{1cm} \text{Accounting coverage: charges to provisions of foreclosed assets.} \\$
- o Book value of the foreclosed asset: sum of net carrying amount and the accounting provision.

Purpose: indicator of accounting provisions covering foreclosed real estate assets available for sale.

| | | 1Q21 | 2Q21 | 3Q21 | 4Q21 | 1Q22 |
|-------------|--|-------|-------|-------|-------|-------|

3- Liquidity

a) Total Liquid Assets

Explanation: Sum of HQLAs (High Quality Liquid Assets within the meaning of Commission Delegated Regulation of 10 October 2014) plus the available balance under the facility with the European Central Bank (non-HQLA).

Purpose: shows the Bank's liquidity position.

| | | 1Q21 | 2Q21 | 3Q21 | 4Q21 | 1Q22 |
|-----|--|---------|---------|---------|---------|---------|
| (a) | High Quality Liquid Assets (HQLAs) | 146,339 | 161,929 | 172,066 | 167,290 | 170,170 |

| | Total liquid assets (a + b) | 147,146 | 162,731 | 173,125 | 168,349 | 171,202 |

b) Loan-to-deposits:

Explanation: quotient between:

- o net loans and advances to customers using management criteria excluding brokered loans (funded by public institutions).
- o On-balance sheet customer funds.

Purpose: metric showing the retail funding structure (enables us to measure the proportion of retail lending being funded by customer funds).

4- Stock market ratios

a) EPS (Earnings per share): Profit/(loss) attributed to the Group (adjusted by the amount of the *Additional Tier* 1 coupon, registered in shareholder equity) divided by the average number of shares outstanding.

Note: The average number of shares outstanding is calculated as average number of shares less the average number of treasury shares. The average is calculated as the average number of shares at the closing of each month of the analysed period. The impacts associated with the merger in the numerator are eliminated in 2021.

d) BVPS (Book value per share): equity less minority interests divided by the number of fully diluted shares outstanding at a specific date.

Fully-diluted outstanding shares equals shares issued (less treasury shares) plus the shares resulting from a theoretical redemption/conversion of the issued exchangeable debt instruments, at a specific date.

TBVPS (Tangible book value per share): quotient between:

- o equity less minority interests and intangible assets.
- o the number of fully-diluted outstanding shares at a specific date.

P/BV: share price at the end of the period divided by book value.

P/TBV: share price at the end of the period divided by tangible book value.

This document is intended exclusively for information purposes and does not aim to provide financial advice or constitutes in any way an offer to sell, exchange, or acquire, or an invitation to acquire any type of security or any financial service or product of CaixaBank, S.A. (hereinafter, "CaixaBank" or the "Company" indistinctly) or of any other company mentioned herein. Anyone who purchases a security at any time must do so solely on the basis of their own judgement and/or the suitability of the security for their own purposes, and exclusively on the basis of the public information set out in the documentation drawn up and registered by the issuer in the context of the specific security issue or offer, having availed themselves of the corresponding professional advice if they consider this necessary or appropriate in accordance with the circumstances, and not on the basis of the information set out in this document.

This document may contain statements relating to projections or estimates in respect of future business or returns, particularly in relation to information regarding investments and investees, prepared primarily on the basis of estimates made by the Company. While these projections and estimates reflect the Company's current opinion or view of future business prospects, certain risks, uncertainties and other relevant factors may cause the actual results or outcome to be substantially different to what the Company currently expects. These variables include market conditions, macroeconomic matters, regulatory and government requirements, fluctuations in national or international stock markets or in interest and exchange rates, changes in the financial position or our customers, debtors or counterparties, and so forth. These risk factors, together with any others mentioned in past or future reports, could adversely affect our business and the levels of performance and results described. Other unknown or unforeseeable factors, or in which there is a degree of uncertainty about their performance and/or potential impact, could also make the results or outcome differ significantly from those described in our projections and estimates.

Past financial statements and previous growth rates are no guarantee of the future performance, results or price of shares (including earnings per share). Nothing contained in this document should be construed as constituting a forecast of future results or profit. Furthermore, this document was drawn up on the basis of the accounting records held by CaixaBank and the other Group companies, and includes certain adjustments and reclassifications to apply the principles and criteria operated by the Group companies on a consistent basis with those of CaixaBank, such as in the specific case of Banco Portugués de Investimento (BPI). Therefore, certain aspects of the information provided herein may not match the financial information reported by this bank. With regard to the historical information of Bankia, S.A. and its group (hereinafter, jointly "Bankia") and that related to the performance of Bankia presented in this document, it should be considered that it has been subject to certain adjustments and reclassifications for the purpose of adapting it to the CaixaBank Group's presentation criteria. In addition, with the aim of showing the recurring performance of the results of the new company arising from the merger, a proforma income statement for 2021 has been drawn up by adding the result of Bankia in the first quarter of 2021. The extraordinary impacts associated with the integration of Bankia have been reported separately from the results.

This report contains a number of the Alternative Performance Measures (APMs) set out in the Guidelines on Alternative Performance Measures published by the European Securities and Markets Authority on 30 June 2015 (ESMA/2015/1057) ("the ESMA Guidelines") so as to provide a clearer picture of the company's financial performance and situation. Please be advised that these APMs have not been audited. These measures constitute additional information and should be treated accordingly. In no event are they intended to replace the financial information drawn up in accordance with International Financial Reporting Standards (IFRS). Moreover, the way the Group defines and calculates these measures may differ to the way similar measures are calculated by other companies. As such, they may not be comparable. Please consult the report's section that includes the details of the APMs used. The report also provides a reconciliation between certain management indicators and the indicators presented in the consolidated financial statements prepared under IFRS.
